 The Republic of the Seychelles

- 80'000 inhabitants
- 90% black African decent
- 90% live on the main island (Mahé)
- 75% of workers are employed in services
- GDP per capita rose from US\$ 600 in 1976 to US\$ 8492 in 2004

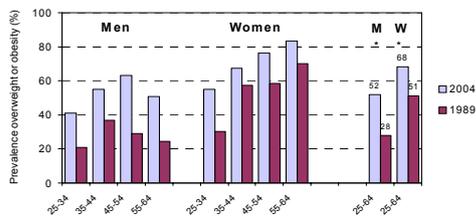

Prevalence of overweight/obesity in population aged 25-64

Prevalence of overweight/obesity: 52%M 68%W
 (~16,000 overweight, ~12,000 obese)

Population attributable fraction (PAF) of diabetes related to overweight and obesity in 2004 adjusted for age and family history of diabetes

	Men		Women		All	
	PAF* (%)	AFE** (%)	PAF* (%)	AFE** (%)	PAF* (%)	AFE** (%)
Overweight (BMI 25-29 kg/m ²)	15	16	18	25	16	20
Obesity (BMI ≥ 30 kg/m ²)	14	28	41	39	27	33
Total excess weight (BMI ≥ 25 kg/m ²)	28	44	60	64	43	53

*In exposed (BMI > 25 kg/m²) and unexposed (BMI < 25 kg/m²) individuals
 **In exposed (BMI > 25 kg/m²) individuals

17 March 2006 David Faeh Evolution du diabète et du syndrome métabolique aux Seychelles

- Evidence from randomized controlled trials on three continents show, that maintenance of modest weight loss through diet and physical activity **reduces the incidence of DM in high-risk individuals by $\geq 40-60\%$ over 3-4 years.**

17 March 2006 David Faeh Evolution du diabète et du syndrome métabolique aux Seychelles

Proportion with atherosclerosis in carotid arteries (Subclinical cardiovascular disease investigated in 4 arteries)

- Atherosclerosis ('narrowed arteries', risk of major CVD) increases sharply with age.
- Less than 10% of persons aged 55-64 have no plaque on the considered 4 arteries.
- Before 55 men > women; after age 55, women ~men

17 March 2006 David Faeh Evolution du diabète et du syndrome métabolique aux Seychelles

Age adjusted population attributable risk fraction (%) of diabetes related to excess weight

	Men		Women		All
